Mannheim – Germany

Dear friends and colleagues,

It is with great pleasure that I invite you to the Mannheim Congress 07 due in June 13-16th, 2007. In Mannheim- Heidelberg University Hospital, we have always chosen one or two topics, invited world recognised pioneers and discussed the selected topics in depth.

This year, the Congress focuses on two topics: long esophageal gaps & replacement and short bowel syndrome. These two topics continue to constitute a major challenge to the Pediatric Surgeon all over the world. Once more, we are inviting the world pioneers to give an updated view on those two fields. Before the Congress, the 5th International Workshop on Hypospadias will be held with live operations and tough discussions covering all related topics. This would be of great interest not only to Pediatric Surgeons but also to Urologists and Plastic Surgeons interested in the field of hypospadias.

The Congress has a special meaning to me, as it coincides with my 65th birthday, the usual retiring age in Germany. I would like to take the chance to welcome you all as friends rather than as my mentors, colleagues and trainees.

Mannheim and Heidelberg has a lot to offer. As you know, Heidelberg University is one of the oldest universities in Europe. It was established in 1368. Kirschner, Röntgen, Wilms and many other pioneers worked in this famous University. June is a good time of the year to visit Germany, with visits to the old city, the historical Heidelberg castle, river cruises on the Rhine River, wine tasting in famous wine fields and enjoying the good German food and hospitality. Looking forward to seeing you all in June in Mannheim- Heidelberg

Karl Waag

Organisation:
